Project AERODYNAMIC

COMMUNICATIONS ANNEX

Renewal

-----copy of 25 copies

I. INTRODUCTION

A. DESCRIPTION

Project AERODYNAMIC is a psychological radio broadcast directed to the population of the Ukraine. The transmission of the broadcast is accomplished from the radio base (PYREX) located in the vicinity of Athens, Greece. Program preparation is accomplished in a recording studio located in the U.S.

B. PURPOSE

This annex constitutes a renewal and an amendment defining the support to be rendered Project AERODYNAMIC by KUCUL during FY-59.

C. STATUS

Project AERODYNAMIC was originally approved late in 1953. However, the first broadcast was not made until 25 September 1955. Initial scheduling called for one 15 minute transmission daily. Over a period of time, this scheduling has been increased to two schedules daily which use two (2) transmitter hours per day.

II. COMMUNICATIONS SUPPORT

A. BROADCASTS

The Project requires two broadcasts per day, in the Ukrainian language, directed to the Soviet Ukraine. These schedules will require two transmitter hours per day for a total of about 60 transmitter hours per month. On the basis of the total current workload at PYREX, this schedule is being met without overtime by the present PYREX staff.

B. EQUIPMENT

No additional equipment is required at the present time.

C. PERSONNEL

No additional personnel are required at the present time.

D. SPECIAL FACILITY CAPABILITIES CONSIDERATION

Substantial changes in the operational requirements for this or any other KUDOVE project supported by PYREX will require a substantial review of project priorities by appropriate KUDOVE authority. The outcome of this action could result in a change in the number of broadcast hours available to the Project.

III. SPECIAL COMMUNICATIONS CONSIDERATIONS

The use of the Random Broadcast technique may be extended to the Project on a time, equipment and personnel availability basis. However, the use of the Random technique by the Project does not represent a commitment on the part of KUCLUB and its utilization is the sole prerogative of Chief, WEMCA. The Random Broadcasts may be suspended or cancelled without advance notice as changing and increasing operational requirements may dictate.

IV. COMMUNICATIONS LOGISTICS SUPPORT DATA

No additions or increases in the personnel or equipment required during the period of this Annex.

V. IMPLEMENTATION AND ADMINISTRATION

Administration of the communications support to this Project will be the responsibility of Chief, WEMCA in coordination with such other communications areas as may be required.
